

Band Saw Blade Sharpener

精密磨鋸機

G-25

Designed to Maximize Blade Service Life While Minimizing Blade Consumption

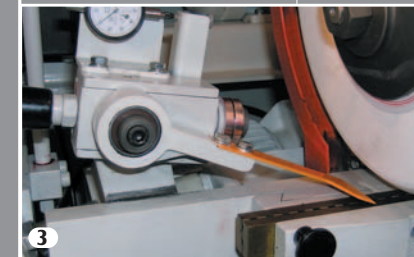

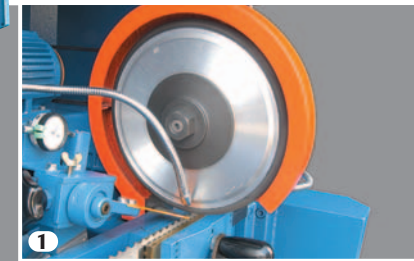

可以讓鋸片的使用壽命發揮到最大，讓鋸片的損耗降到最低。

FEATURES:

- The wet grinding feature assures extremely fine finish on teeth surfaces and greatly extends cutting period of sawblade.
- Grinding amount adjustment is accurately indicated by dial gauges.
- Variable grinding speed is controlled by frequency inverter.
- The micro-computer control provides automatic and humanified operations.
- Electronic parts and circuit design meet CE standards.
- Electronic parts feature multiple interference resistances and protections.

特性：

- 採用濕式研磨，確保研磨後的齒面光滑度，有效延長鋸齒的鋸切時數。
- 研磨量的調整，全部使用百分表顯示。
- 研磨速度的調整，採用無段變頻設計。
- 本機器採用微電腦可程式控制器，操控自動化、人性化。
- 電器零件與線路設計，完全符合歐盟CE安全規範。
- 電器多重抗干擾與保護措施。

精密，自動，人性化

Precise! Automated! Humanified!

1. G-25精密磨鋸機，採用濕式研磨，可以選用鑽石砂輪(SDC)或氮化硼砂輪(CBN)，使用SDC或CBN砂輪，可獲得較光滑細緻而耐久的鋸齒。

The G-25 Band Saw Blade Sharpener employs wet grinding method. It accommodates a diamond grinding wheel(SDC) or a CBN grinding wheel to achieve finer teeth surfaces effect and increased teeth life.

2. 前傾角調整，簡單而確實，前傾角的調整不影響鋸齒齒型的其他調整。

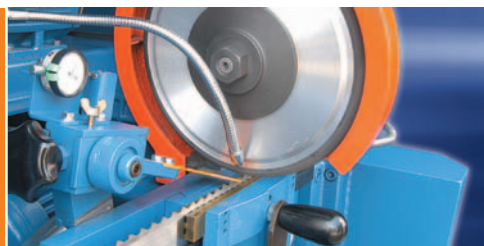

Easy to adjust front rake angle without affecting teeth profile and other adjustments.

3. 精確的鋸片推進機構，確保鋸片精準的微量研磨，讓鋸片的研磨損失降到最低。

High precision blade feed mechanism ensures accurate fine grinding, while reducing grinding loss to a minimum.

4. 本機裝有油霧收集，避免工作環境污染，造成損害人員的健康。

The machine is equipped with a oil mist collector. It avoids working environment pollution and damage to personnel.

精密磨鋸機 Band Saw Blade Sharpener

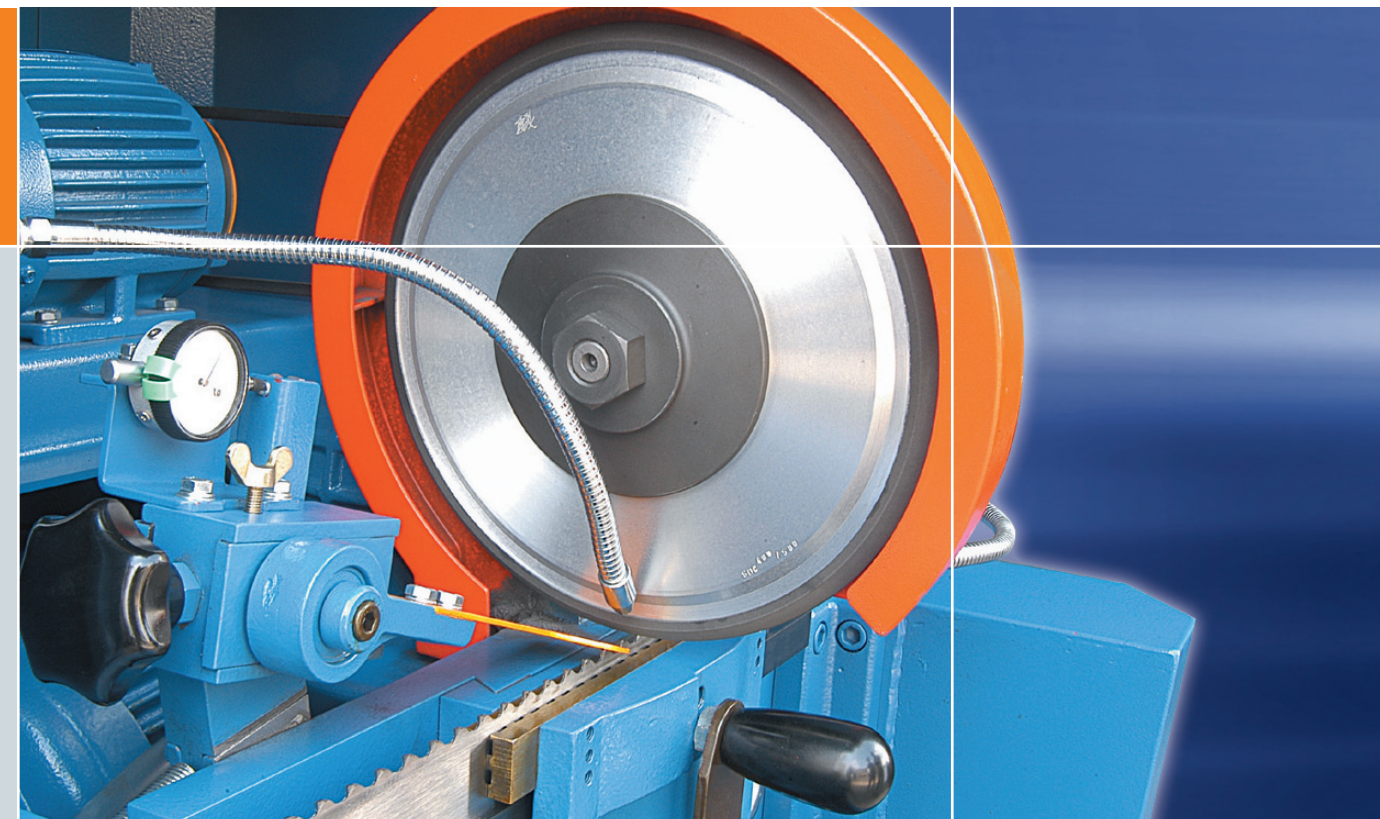

SPECIFICATIONS:

MODEL	機型	G-25
Motor	馬力	1HP+1/4HP+1/8HP
Blade thickness	鋸片厚度	<2mm
Blade width	鋸片寬度	35-40mm
Blade length	鋸片長度	Unlimited(無限)
Tooth pitch	齒距	<20mm
Tooth height	齒高	<5mm
Front rake angle	前傾角	5-15Degrees
Working speed	研磨速度	1.4-6.4 Sec./tooth

- All specifications, dimensions, and design characteristics shown in this catalog are subject to change without previous notice.
- 本公司之產品規格、設計特行均不斷研究改進，規格如有變更，數不另行通知。

G-25 Band Saw Blade Sharpener

薄片框鋸機的專屬搭配機種
 A Peripheral Equipment for Frame Saw

- Wet grinding guarantees a longer life of the sawblades.
- Very precise grinding module.
- Exact guiding of sawblades guarantees a minimum stellite loss.
